Research Monograph:

Graduate Textbook:

Published Research Papers:

10. Fractional boundary value problems and Lyapunov-type inequalities with fractional integral boundary conditions, *EJQTDE*, **43** (2016), 1-16. (with S. Dhar and M. McCabe)

37. On a generalized discrete beam equation via variational methods, *Communications in Applied Analysis, 16* (2012), 293-308. (with J. R. Graef, L. Kong)

63. Positive solutions of even order system periodic boundary value problems, Nonlinear Analysis-TMA, 72 (2010), 1778-1791. (with M. Wang)

64. Nodal solutions of multi-point boundary value problems, Nonlinear Analysis-TMA, 72 (2010), 382-389. (with L. Kong and J. S. W. Wong)

65. Higher order boundary value problems with nonhomogeneous boundary conditions, Nonlinear Analysis-TMA, 72 (2010), 240-261. (with L. Kong)

68. Existence of Nodal Solutions of Multi-Point Boundary Value Problem, Discrete and Continuous Dynamic Systems, Supplement 2009, 457-465. (with L. Kong)

76. Sturm-Liouville problems on time scales with separated boundary conditions, *Results in Mathematics*, 52 (2008), 111-121.

85. Multi-point boundary value problems with nonhomogeneous boundary conditions (II), *Communications on Applied Nonlinear Analysis*, 14 (2007), 93-111. (with L. Kong)

114. Inequalities among eigenvalues of singular Sturm-Liouville problems,*Dynamic Systems Appl.*, **8**(1999), 517-531. (with H. Wu and A. Zettl)

142. Oscillation results for second order neutral differential equations, *Funkcialaj Ekvacioj (Serio Internacia)*, **35**(1992), 545-555. (with L. H. Erbe)
